They were chosen randomly

>>How to select randomly? Please short explain

- Its data were collected by using Google Forms

>> grammatically error

- OR?? Please state the abbreviation which comes first.
- Conclusion: Indonesian are ready to face the Covid pandemic.

>> This conclusion is over expectation from the result of this study. The Public participation can decrease COVID-19 transmission rate.

Conclusion MUST come from the result of this study.

please write correctly the Covid-19.

II. Introduction

- Paragraph needs to restructure:

1. Paragraph one, sentence one: No reference.

Paragraph one should contain motivation of this study. Please shown the motivation of study clear and compactly.

2. Paragraph two:

- It is hard to read. The author needs to write an only the month of date.
- Reference (WHO, 2020b) ◇ please check the writing

3. Paragraph 3-4:

- Needs grammatically check
- Mudik ◇ no need!
- Overall introduction, I could not find the research motivation, finding from previous study, and strategy of this study in the introduction.

III. Methods

- Please explain the method for inviting participant
- Please explain for selecting samples.
- Explain 5 cities?
- Author wrote: "The measures of readiness were degreed by using the 5-degree Likert scale, used to degree responses for 14 questions."

What kinds of scale? Who develop? Is it a validated questionnaire or not?

If authors developed, please explain how to develop?

- Authors grouped into those carried the most (high readiness level) and those carried the least (low readiness level).

HOW?

- How to collect informed consent from participant, explain!

IV. Results

- Please re-check the writing
- Authors do not need to explain all results on the table into text. Please choose a different way to report on text.
- Please shows on table how to categories high readiness level >> the majority of Indonesians (77.2%) were ready to face COVID-19

V. Discussion

- Discuss based on gender, because the different of sample based on sex is high F:87.2% M: 12.8%

It should affect the result.

- On discussion, readers want to the interaction of all points on the result. Author needs to discuss each point of results separately, however, interaction each other result needs to discuss.
- Please state the association of this study with previous study results not only positive association but also negative association. Author also needs to stand their position on the result of this study at discussion.
